Studienfach an der HHU / Subject at HHU: Industrial Pharmacy

Joining the Industrial Pharmacy department at Heinrich Heine University Düsseldorf was an eye opening and life changing experience for me. This report aims to summarize my experience at the university while touching on research possibilities, hands-on training events and the graduate community more generally. Known for its outstanding research environment and rigorous programs, the University of Düsseldorf proved quite a productive place to develop personally as I did professionally. The curriculum offered by the Industrial Pharmacy department at University of Düsseldorf is quite reputed in the long run and appropriately strikes a balance between theoretical knowledge and practical coursework. The created courses give the topics such as drug discovery, pharmaceutical development, quality management, stability testing, quality control, regulatory affairs and so on.

The University of Düsseldorf offers a vibrant student community as well in addition to a balanced and fulfilling experience off-campus. The university campus is provided with good facilities like modern lecture rooms, well-equipped laboratories and an enormous central library. The sweep of books, periodicals and internet materials in the library is an absolute boon for both academics as well as students. Greatly announced the thriving diversity of University Düsseldorf among — well, people at a university. Having students from all over the world creates a really good cultural exchange at university. The International Office provides an extensive support system to help foreign students with everything from language courses and cultural events, orientation programs.

Support services the institution of higher education goes to great depth, exercising every reach in its support for the well-being or otherwise injuries prevention of its students; these come from extended student-services through Student Service Centre (SSC). There are plenty of academic coaches and career pathways to guide a student in their future academic and professional endeavors.

It has been a very interesting, challenging and satisfying period for me to work in the laboratory of The Industrial Pharmacy department at University of Düsseldorf. Its bulging academic syllabus, accompanied by copious hands-on training and research opportunities have already given me a robust base for thriving in the pharmaceutical industry. Thanks to my professional development, but thanks also for the kind and supportive university environment which enriched me as a human being. No doubt, the experience I gained, challenges I faced and friendship will be going through this career path along with me forever. Although, there were difficulties to register for courses and exams and to get the result, the supportive teachers were there to overcome the difficulties.

All in all, I spent a very important, life changing and crucial time of my life at HHU and made lots of

memories in Germany. I would like to wish for all of the professors, teaching and non teaching staff and my friends for good health and continued success.

Ich stimme der Veröffentlichung meines Erfahrungsberichtes ohne Nennung meines Namens auf den Internetseiten der Heinrich-Heine-Universität zu.
